AB Organosilicon compd. layers (thickness .ltoreq.2 .mu.m) having siloxane bonding are formed on the surfaces of the AlN powder. The organosilicon compd. layers are prepd. from coating compns. contg. (A) SiO2-dispersed oligomer solns. of organosilane prepd. by hydrolysis of hydrolyzable organosilane having general formula R_1nSiX_4-n [R_1 = C1-8 monovalent hydrocarbon groups (same or different, substituted or unsubstituted); n = 0-3 (integers); X = hydrolyzable group] in org. solvent, or partial hydrolysis of organosilane in colloidal SiO2-dispersed org. solvent and water; (B) silanol group-contg. polyorganosiloxanes having av. compn. formula $R_2aSi(OH)bO(4-a-b)/2$ [R_2 = C1-8 monovalent hydrocarbon groups (same or different, substituted or unsubstituted); 0.2 .ltoreq. a .ltoreq. 2; 0.0001 .ltoreq. b .ltoreq. 3; but $a + b < 4$]; and (C) catalyst. The powder is used as filling materials for plastics.

ST aluminum nitride powder water resistance; chem resistance aluminum nitride powder; filler plastic aluminum nitride powder

IT Catalysts and Catalysis
 (contg. dibutyl-tin-dilaurate, in formation of organosilicon compd. coatings on aluminum nitride powder)

IT Plastics
 RL: USES (Uses)
 (fillers for, organosilicon compd.-coated aluminum nitride powder as)

IT Silanes
 Siloxanes and Silicones, uses
 RL: USES (Uses)
 (org., coatings, on aluminum nitride powder, for resistances to water and chems.)

IT Coating materials
 (organosilicon compd., on aluminum nitride powder, for resistances to water and chems.)

IT Water-resistant materials
 (fillers, chem.-resistant, organosilicon compd.-coated aluminum nitride powder as, for plastics)

IT 77-58-7 3069-29-2, N-.beta.-Aminoethyl-.gamma.-aminopropylmethyl-dimethoxysilane
 RL: CAT (Catalyst use); USES (Uses)
 (catalyst contg., in formation of organosilicon compd. coatings on aluminum nitride powder)

IT 24304-00-5, Aluminum nitride
 RL: USES (Uses)
 (powder, organosilicon compd.-coated, with resistances to water and chems., as fillers, for plastics)

ACN
